BANKERS' COMMITTEE! N. Y. CURB MARKET STRIVES TO CLARIFY

The program of this educational work consists of a series of ten lectures on the subject of banking with the view of taking the mystery out of the profession, at the mame time emphasizing the essential need of thrift. These lectures consist of 20-minute discussions of every phase of modern banking and are delivered by prominent Washington financiers who have been consciouse in their particu been conspicuous in their particular field. They are carried on under the auspices of the educational committee of the American Bankers Association, through the District ssociation, through the Districtanch of that organization.

Chairman Haynes estimates that at least fifty bankers will be required to carry out the extensive program which has been outlined for the city. While none have been assigned definite fields, he stated that Victor R. Devher will shouth. assigned definite fields, he stated that Victor B. Deyber will shortly address the Columbia Junior High School and Maurice D. Rosenberg and Henry H. McKee will speak at Central and Eastern, respectively.

The committee has been greatly aided in carrying on this work by the splendid co-operation of Dr. Ballou, superintendent of District schools.

PROFESSION'S ETHICS

Execute Program of Lectures

Before School Children

of District.

By CHAS. P. SHAEFFER.

The Committee on Public Education of the District Bankers' Association began to function actively yesterday when Harry V. Haynes, chairman of the body, delivered two addresses before students of the Western High School. Mr. Haynes addressed his audiences on "What Is a Bank?"

The program of this educational by Cosmepolitan News Service.

By CHAS. P. SHAEFFER.

Candy, tobacco and motor stocks and the session in industrial stocks. A late demand for Schulte Stores developed a somewhat better tone. Prices were reactionary to some extent, but the ranks of the professional element on the short side appeared to lose confidence and began covering in a small way. Trading continued to drag in an interesting manner and there were no wide fluctuations.

Cities Service and a few others moved higher, but the gains were not held in all cases.

Candy, tobacco and motor stocks are demand for Schulte Stores developed. Durant Motors was most active of automobile stocks. Reppetit Candy reached a new high. Strength Candy reached t

European Unrest. Causes of Unrest. Germany's Finances. Inter-Allied Debts.

By GEORGE W. HINMAN. By GEORGE W. HINMAN.
CHICAGO, Nov. 24.—Suppose
America's business is wholly entangled with Europe's? Suppose
America's economic welfare is actually bound up with Europe's economic welfare? Suppose America's commercial prosperity is entirely dependent on Europe's prosperity?
Suppose all these things which
are not so and—what then?
The question keeps coming back.
It is put and answered by propagandists before chambers of commerce and business men's associations. At present an eminent for-

tions. At present an eminent for-eign statesman is addressing busi-ness men on the subject. What then? Let us see.

WHAT CAUSES UNREST? First, all the familiar answers aside, what and who are the causes of the unrest that apsets Europe's business, paralyzes Europe's industry, pauperizes Europe's population? In the East, Russia. In the West, France. Russia and France may dispute this. Other nations in Europe do not. Other nations lay the cause of the continued business turmoil

of the continued business turmoil largely at the doors of these two. Let Russia's case pass. What then of France? This question brings us to another point.

Second—France is disturbing the world's business and is perpetuating commercial confusion, by following primarily a policy not of profits or reparations, but of vengeance upon Germany. She has piled up the age-old grievances of history and is trying to get satpiled up the age-old grievances of history and is trying to get satisfaction from Germany for them all. As John Leyland says in the last Fortnightly Review. France still has the "Napoleonic idea." Vengeance kills business. Suppose labor tried to wreak vengeance on capital for all the wrongs of a hundred years or capital tried to avenge on labor all the grievances of a century in the United States. Imagine then the condition of business. So also in international affairs. affairs.

THE GERMAN DEBT.

THE GERMAN DEBT.

Third, in following this policy France has made the business of Germany and Central Europe a grotesque and almost impossible proposition. German reparations can't be paid because Germany is stripped of money and resources to satisfy other demands of France. Today Germany owes more reparations than ever, 500,000,000 more. She has made more than \$2,500,000,000 in cash and far more in kind, but she owes more than ever. She has paid billions of gold marks to support the French army of occupation, yet she owes more than ever. Her total debts today in reparations is above \$34,000,000,000. France says that, until this debt is paid there can be no economic reconstruction, yet she so handles the debt that it cannot possibly be paid, as Mr. Leyland says. There is no economic revival of business reconstruction on the continent of Europe. INTER-ALLIED DEBT.

Fourth, we hear that the inter-Allied debts must be readjusted be-fore confidence and business can bloom again. France says she cannot take in hand her debts to Establishment of "trade zones" at important American ports was recommended to President Harding at the White House yesterday by O. K. Davis, secretary to the National Foreign Trade Council. Such zones, Davis maintained, would relieve the congestion now existing in government bonded warehouses and would greatly expedite the shipment of goods imported from abroad for manufacture and re-exportation, in the property of Europe in a condition of fear, militarism and business prostration.

Senator Harrison gave the name of five prominent workers in the negro cause who he declared were to share in the fund. His setenant was as follows:

because it is pretty generally une derstood, I think, that certain persons have a contract with the government of Liberia that in the event this loan is made they will receive a fee or commission of \$650,000. It is pretty generally understood that the five persons who have this contract with the government of Liberia are members of the colored race. Their presence has been very conspicuous around the corridors of the Capitol buttonholing Senators, and using every influence in order to obtain the passage of this legislation. If the rumors that are flying around are correct, and I hope some one can put us right if they are not, the persons who are to receive this commission and share in the profits of \$650,000 which the taxpayers of the United States will have to pay, are the following:

"PRAISES" LEBERIANS.

Senator Norris made an amusing speech referring to the part Liberia played in the war and declared he was astounded that any Senator should oppose the bill in view of the heroic services which the Liberian army and navy performed.

An agreement to vote on the bill at 2:30 Monday was entered into. Senator Simmons, of North Carolina, leading the Democratic opposition to the bill, offered a motion to recommit it to the Finance Committee with instructions to eliminate all matter in the bill except the Borah amendment to appropriate \$20,000,000 for reclamation projects and the Harrison amendment, setting aside \$170,100 for boiler inspectors on the railway systems. The Simmons motion was pending when the Senate adjourned to Monday.

Commission Declares Private Interests Seek Right to Nullify Act.

APPLICATIONS FILED

These Represent Twice Horsepower Existing in Nation at Present.

By Universal Service.

Private interests are attempting by special legislation to obtain concessions which threaten disintegration of the national waterpower policy. Their success would constitute a partial repeal of the Federal water power act, at a time when more "white steam" development is under way than ever before. This is declared in the annual report of the Federal Power Commission made public yesterday. Its chairman is Secretary of War Weeks; its other members are Secretary of the Interior Fall and By Universal Service retary of the Interior Fall and Secretary of Agriculture Wallace. The executive secretary, O. C. Merrill, wrote the report, which says in part:

During its second year there have been filed with the commission applications aggregating a net total of 5,000,000 horsepower of proposed installation. This amount, added to the applications of the preceding fiscal year, makes a grand total of 357, involving in the process of 21,100,000 horsepower.

This amount is more than twice the existing water power instal-lation of the United States, and lation of the United States, and more than six times the aggregate of all applications for water power sites under Federal control in the preceding twenty years. On June 24 the State of New York filed a bill in the Supreme Court of the United States asking that the commission be enjoined from enforcing within the State of New York certain provisions of the Federal water power act, alleged to be in excess of the constitutional authority of the United States, or any interpretation thereof which would trespass upon the rights of the trespass upon the rights of the

terpretation thereof which would trespass upon the rights of the State.

Of equal importance and perflaps of greater danger are the indirect attacks on the act. There are movements on foot to secure for certain sites or streams special legislation, which, if approved, would constitute a partial repeal of the Federal water power act, and would eventually result in the progressive disintegration of our present national water power policy.

If these proposals be granted it will be found that some or all of the essential features of the act have been omitted, even when provisions in direct conflict have not been substituted.

The results already accomplished afford convincing evidence that grants of special privileges are not necessary to secure the development of all the electric energy the market can absorb.

Congress made no mistake in

absorb.

Congress made no mistake in its declaration of policy in the act of 1920, but it would be a serious mistake to permit that policy to be essentially modified.

The proposals are primarily attempts to circumvent the present law. If successful they would be dangerous not only in themselves but as precedents for similar action in the future.

If we are to conserve our diminishing fuel supply, are to reduce the burden of coal transportation, are to increase the supply of electrical energy and reduce its cost, we must utilize our water

cost, we must utilize our water powers to the fullest practicable extent.
